University of Michigan
College of Pharmacy
APPE Readiness Program

The APPE Readiness Program ensures that students have achieved competency in contemporary educational concepts such that they are ready to enter advanced pharmacy practice experiences (APPE). APPE readiness is determined using embedded assessments that occur throughout the first (P1) through third (P3) professional years. Students can only progress to APPEs after successful completion of all elements of this plan.

1. **Knowledge Assessment**: Students must achieve a grade of at least C- in order to pass a course. Any student receiving a grade of below C- is referred to the Committee on Academic Standing.
   a. In addition to the requirement of an overall course grade of C-, some courses also require a 70% average for knowledge exams within the course (e.g., therapeutics course series). Failure to achieve an overall 70% for combined exams in these courses will result in a D grade as the maximum grade for the course, regardless of the overall course grade.

2. **Skills Assessments**: In addition to participating in all simulated patient interactions in a course, students are required to complete core clinical skills sessions. Students who miss a class session in which a core clinical skill is taught and/or assessed (see table below) are required to email the lab coordinator and faculty prior to or within two business days of the absence in order to determine a plan for making up the clinical skill. Students who do not make up the activity before the end of the semester will receive an incomplete in the course until the skill is successfully demonstrated. This policy applies to both approved and unapproved class absences.

<table>
<thead>
<tr>
<th>Perform the following physical assessments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Perform manual blood pressure and radial pulse assessment</td>
</tr>
<tr>
<td>Perform an edema assessment</td>
</tr>
<tr>
<td>Perform cardiopulmonary resuscitation</td>
</tr>
<tr>
<td>Perform a foot exam</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Educate patients about devices to administer a medication</th>
</tr>

<table>
<thead>
<tr>
<th>Effectively communicate with patients and health care professionals</th>
</tr>
</thead>
<tbody>
<tr>
<td>Demonstrate effective communication skills during simulated patient activities</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Fulfill a medication order</th>
</tr>
</thead>
<tbody>
<tr>
<td>Demonstrate reconstitution of an oral suspension</td>
</tr>
<tr>
<td>Demonstrate proper donning and doffing of personal protective equipment</td>
</tr>
<tr>
<td>Demonstrate the ability to prepare an intravenous product</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Ensure that patients have been immunized against preventable diseases</th>
</tr>
</thead>
<tbody>
<tr>
<td>Demonstrate the ability to administer an intramuscular injection</td>
</tr>
<tr>
<td>Demonstrate the ability to administer a subcutaneous injection</td>
</tr>
</tbody>
</table>

In addition, core embedded benchmark skill assessments exist within various courses in the curriculum. To ensure APPE readiness, students must pass the **core benchmark embedded skill assessments shown in Table 1**. The Office of Experiential Education may use data from the P3-skills assessments to help inform APPE scheduling, placing students who score low on these assessments into clinical rotations early in the year.

^Approved by Curriculum and Assessment Committee, 4/2018; updated 5/2021 (Top 200), 8/2021 (required skills)
3. **Standalone Assessments within Courses:** The calculations and Top 200 exams are standalone high-stakes benchmark assessments that are incorporated into required courses. The Top 100 exam is a standalone medium-stakes assessment that is incorporated into a required course. The consequences for not passing these assessments are defined in the College’s Academic Progression and Remediation Policy.

4. **Introductory Practice Experiences (IPPEs):** All students are required to complete IPPEs in their second and third professional years. These experiences provide students the opportunity to apply practice- and patient-care skills taught in the curriculum in a real-world setting. All IPPEs also emphasize interpersonal communication. The required IPPEs include:
   a. Community IPPE (P603; P2 year): Practice skills in the community setting
   b. Ambulatory Care IPPE (P613; P2 year): Patient-care skills in the ambulatory care setting
   c. Health system/hospital IPPE (P703; P3 year): Practice skills in institutional setting
   d. Direct Patient Care IPPE (P713; P3 year): Patient-care skills in institutional setting

Students must receive a satisfactory score for at least 70% of the evaluated items on each IPPE in order to receive a passing grade and progress through the curriculum.

</tr>
<tr>
<td></td>
<td>Thumbnail Case Presentation</td>
<td></td>
</tr>
</tbody>
</table>

*Students must demonstrate competency for all of these assessments in order to pass each course.

**There are no embedded skills assessments in winter term of the P2 year. New skills are introduced and practiced in this semester and are formally assessed in fall term of the P3 year.
