Green Wolverine was founded with the goal of promoting education and public awareness of the importance of evidence-based discourse, in terms of deciding the future of cannabis in medicine, research, and industry.

Through collaboration with the University of Michigan College of Pharmacy and School of Nursing, Green Wolverine is hosting speakers from across the country for a cannabis science symposium. This is the first student-organized science symposium of its kind at the university.

**Agenda**

10:00am-12:00pm Morning Lectures  
12:00pm-12:30pm Moderated Panel #1
