Hi everyone. Thanks so much for being flexible during this time. Attached to this email are the lab signs that we need to try and post by 5pm today. I *hope* this is the final communication I will need to send to you all about this.

Please use the mission critical sign if you are going to have people coming into the lab to check on freezers or tanks, or to perform maintenance operations. The font on this sign is red.

For those labs who do not need lab access to do maintenance activities please post the suspended activities sign. The font on this sign is black.

Also, the paragraph below is from the UMOR webpage regarding those of you interested in doing COVID19 research. If this is your lab please email the address below to get their approval for this.

Again, unless you have been given a specific exception, all research operations should stop as of 5pm TODAY!

COVID-19 Research

The Office of the Vice President for Research has organized a committee to review and prioritize new or modified research projects related to COVID-19 that involve university resources, including human subjects, basic laboratory and animal research, or require significant university resources to stand up. U-M researchers that are interested in leading COVID-19 research are encouraged to email research.covid19@umich.edu.

There also is an MCubed community that has formed around COVID-19 research

https://mcubed.umich.edu/community/covid-19-research

Please let me know if you have questions

Vicki
