Subject:
U Mich COP - Information Regarding Your Ambulatory Care IPPE Course

Message:

Hello, P2 Students,

I hope that you are all doing well. As you probably know, concerns about COVID-19 are having a significant impact on experiential rotations, and my team and I are working to develop plans to manage the concerns. Many of you have contacted Dr. Thompson about your IPPE. I’m writing to provide information about your Ambulatory Care IPPE. I apologize for not being able to provide you information sooner.

Because you are in Group C, you have not completed the three required clinic visits. Unfortunately, because many practice sites have closed their doors to student learners right now, you will not be able to complete the remaining clinic visits this semester. We are working to identify when and how your clinic visits can be made up, but this is largely dependent on when health systems allow students back into the practice setting. If needed, we will incorporate these three clinic visits into your P3 year so you meet the course requirements.

The other remaining course requirements – the debrief week and the IPE event for this year – have been cancelled. So, your Am Care IPPE course is over for the semester. You will receive an "I" grade until the clinic visits can be made up, with the final grade replacing the "I" grade once the requirements are completed. The Office of Experiential Education will work with the curriculum committee to determine if and how the IPPE hours connected to the IPE (interprofessional) experience will be made up and will communicate any plans to you at a later date.

Thank you for your understanding and cooperation.
