The Ups and Downs in Drug Design

Adventures in Medicinal Chemistry

Victor E. Marquez, Scientist Emeritus, National Cancer Institute, NIH, USA

The Ups and Downs in Drug Design: Adventures in Medicinal Chemistry highlights the necessity for an integrative approach in Medicinal Chemistry and Chemical Biology. As Medicinal Chemistry is not a monolithic science, it is important to emphasize the other various disciplines that are required for successful drug design. This book presents the authors' own personal experience in this field and describes the "ups" and "downs" that come with drug discovery. This book is an excellent companion text for graduate and postgraduate students who would like further insight into the parameters of drug design, including the challenges that come with the project.
