Dear PharmD Students,

I have received questions regarding winter term grading and hope that that the following information is helpful. If there are other questions I can assist with please let me know.

Unmasking Grades
For winter 2020 term, final grades for all 14 week and second 7 week graded courses will appear on the transcript as P (Pass) or NRC (No Record Covid). Students have the option to unmask the Pass or NRC to show the actual grade that was received on the transcript. You can submit the request in Wolverine Access to unmask a grade until July 1, 2020. This is a one-time election, and cannot be changed once the request to unmask a grade is submitted. Instructions on how to request that a grade be displayed in place of P or NRC are as follows:

- Navigate to the "View My Grades" page. (This page is accessible multiple ways, the quickest is: maizelink.umich.edu and then click on, or search for, "View Final Grades.")
- Review Winter 2020 grades.
- For each class, an official grade of P, S, or NRC displays along with the grade entered by the instructor.
- To change the grading basis back to the letter grade for an eligible class, click the "Request" button.
- Review the message box to confirm the correct course and grade display. The action of changing a grading basis cannot be undone.
- To confirm, click "OK".

First 7 week courses are not included in the Pass/NRC grading. Since those grades were submitted prior to March 10 they appear on the transcript as the grade entered and posted at that time. For COP, this includes the Pharmacy 527 course with Dean Mueller. If you completed this course as graded, the grade you earned will appear on your transcript. If you enrolled in this course as optional pass/fail, then a P will appear on your transcript.

COP GPA Calculation for Winter 2020
The College of Pharmacy will use the actual grade submitted by the instructor for winter term courses when calculating grade point average. Even if you choose not to display the grade on your transcript, for College of Pharmacy GPA calculations we will still use the actual grade you received.

- Elective courses that were changed to optional Pass/Fail by the late edit deadline of March 6 will not be included in COP gpa calculations.
- Elective courses with a “graded” grading basis as of March 6 will be included in COP gpa calculations for winter term.
- For any elective course, whether or not you choose to display the grade on the transcript is
up to you (by July 1). However, we will follow what the grading basis was for the elective as of March 6 for gpa purposes.

- Courses only graded as P/F, S/U, or Credit/No credit are never included in gpa calculations as they do not carry any honor points.
- The grade point average displayed on your transcript will be calculated using only the grades that you request to unmask/display. This may be different from the COP gpa calculations since we will include all graded courses, and exclude only those graded as optional pass/fail by March 6 or only offered as P/F, S/U, or Credit/No Credit.

Again, if there are additional questions I can assist with please let me know.

Best,
Crystal
